High Speed Paper Sheeter Machine

Fast and clean cuts on lower GSMs. Experience the expretly built folio size FCT Single Rotary Paper Sheeter Machine.

Technical Features

Knife Technology Kesim Teknolojisi	Rotating Top Knife & Fixed Bottom Knife Üst bıçak hareketli Alt bıçak sabit
Min. - Max. Cutting Thickness Min.-Max. Kesim Kalınlığı Min.	40 - 500 GSM (gr/m²)
Max. Cutting Speed Max. Kesim Hızı	300 meters / minute 300 metre/dakika
Cut Length Accuracy Boy Kesim Hassasiyeti	± 0,25 mm
Slitting Knives Dilimleme Bıçakları	3 pieces, 2 sheets 3 adet , 2 kombine
Min. - Max. Cutting Length Min. - Max. Kesim Boyu	FCT 1050 - FCT 1250 - FCT 1450 FCT 1650 400-1450 mm / 400-1650 mm
Max. Roll Capacity Max. Bobin Kapasitesi	1 / 2 / 4
Max. Roll Width Max. Kesim Geniřlięi	FCT 1050 FCT 1250 FCT 1450 FCT 1650 1030 mm / 1230 mm / 1430 mm / 1630 mm
Max. Roll Diameter Max. Bobin Çapı	ø1800 mm / ø2040 mm (opt.)
Max. Roll Weight Max. Bobin Aęırlıęı	3000 kg
Max. - Min. Roll Core Diameter Max. - Min. Bobin Göbek Çapı	12 inch - 3 inch
Max. Stack Height (Inc. Pallet) Max. İstif Yükseklięi (Palet Dahil)	1600 mm
Decurler Unit Dip Kıırma Ünitesi	Motorised Built-In Motorlu Entegre
Tab Inserter Şerit Atma	Programmable Programlanabilir
Warranty Garanti	2 Years or 5.000 Operating Hours 2 Yıl veya 5000 Saat

FCT

High Speed Paper Sheeter Machine

High-Speed Cutting Technology

Yüksek Hızlı Kesim Teknolojisi

Single Rotary Knife Technology including one rotating top knife cylinder, one fixed bottom knife and sharpanable knives that grants a clean cut, even on high speeds, without dust or burr on materials up to 500 GSM at a maximum cutting speed of 300 meters / minute.

Roll Holder Stand & Automatic Web Tension Control

Bobin Standı ve Otomatik Tansiyon Kontrol

Button controlled hydraulic and shaftless roll stands provide a fast and easy roll loading and core unloading system. One piece conical roll holder heads are suitable to use on all roll core diameters. Get the suitable web surface tension with the dancer rolls and adjustable pressure control system.

Web Edge Guide Unit

*(Standard feature only on 4 roll models)
Kenar Kontrol Ünitesi
(Sadece 4 bobinli modellerde standart)*

Fully automatic motor controlled Web Edge Guide Unit lines up all of the webs to grant a uniform cutting and stacking.

Slitting Knives and Decurler Unit

Dilimleme Bıçakları ve Dip Kırma Ünitesi

Equipped with 3 positionable slitting knife stands, slitting station uses sharpanable slitting knives which provides long time operating without needing of a new slitting knife set. Eliminate the curling of the paper caused by the roll geometry with the built-in decurler section.

Conveyor-Stackers - Tab Inserter

Konveyör-İstif-Şerit Atma

High grade Acrylonitrile-Butadiene-Rubber conveyor belts provide a safe and fast transfer of the cut sheets to the stackers. Anti-Static Bars eliminate the static electric buildup on the web. With vibrating stainless steel plates and back joggers, stackers provide perfectly leveled stacks on all sides. Tracking the number of sheets on the stack is possible by the programmable tab inserter.

Control Panels

Kontrol Panelleri

High resolution touch screen main control panel with 6 built-in languages, and other LED control panels are easy to understand and operate
